Installation

This document describes how to download and install RTI® Persistence Service and other required components.

1 Optional Database Components

When *Persistence Service* is used in PERSISTENT mode, you can configure it to store DDS samples into a relational database, such as MySQL.

In principle, you can use any database that provides an ODBC driver, since ODBC is a standard. However, not all ODBC databases support the same feature set. Therefore, there is no guarantee that the persistent durability features will work with an arbitrary ODBC driver.

RTI has tested *Persistence Service* with MySQL 5.1.44 with MySQL ODBC 5.1.6.

The usage of MySQL requires the separate installation of the MySQL ODBC 5.1.6 (or higher) driver. For non-Windows platforms, the installation of UnixODBC 2.2.12 (or higher) is also required.

- ☐ To use MYSQL, you will need:
 - MySQL 5.1.44 or higher (download from http://www.mysql.com)
 - MySQL ODBC 5.1.6 driver or higher (download from http://dev.mysql.com/downloads/connector/odbc)
 - UnixODBC 2.2.12 or higher (download from http://www.unixodbc.org.)

The Durable Writer History and Durable Reader State features in RTI ConnextTM (formerly RTI Data Distribution Service) also use a relational database. Therefore, the installation instructions for MySQL are provided in the RTI Core Libraries and Utilities Getting Started Guide Addendum for Database Setup.

If you need help with the download or installation process, contact **support@rti.com**.

2 Installation Instructions

Persistence Service is included with *RTI Connext Messaging*. Use the instructions in this section only if you are installing *Persistence Service* independently (not part of *RTI Connext Messaging*).

2.1 AIX, Linux, and Solaris Systems

You do not need administrator privileges to install *Persistence Service*.

Install *Persistence Service* on top of *Connext* (with the same version number). After installation, the **rtipersistenceservice** application will be located in the **<NDDSHOME>/scripts** directory (the same place where you will find *rtiddsgen*, *rtiddsping*, etc.).

Follow the instructions below. All directory locations in this document are meant as examples only; adjust them to suit your site.

- **1.** Make sure you have GNU's version of the tar utility, **gtar** (which handles long file names), and GNU's version of the unzip utility, **gunzip**.
- **2.** Move the downloaded file to the *same* directory where you installed *Connext* 5.x.y (where x and y represent version numbers for the current release). For instance, if you already have /local/rti/ndds.5.x.y, move the downloaded file to /local/rti and change to that directory:

```
> cd /local/rti
```

3. Use **gunzip** to uncompress the file. For example (your filename will be different):

```
> gunzip RTI Persistence Service-5.x.y-sparcSol2.10gcc3.4.2.tar.gz
```

4. Use **gtar** to extract the distribution from the uncompressed file. For example:

```
> gtar xvf RTI_Persistence_Service-5.x.y-sparcSol2.10gcc3.4.2.tar
```

This will extract files into the existing **ndds.5.x.y** directory; including placement of the **rtipersistenceservice** application in /local/rti/ndds.5.x.y/scripts.

5. Include **\$NDDSHOME/scripts** in your **PATH** if it is not already included:

```
> setenv PATH $NDDSHOME/scripts:$PATH
```

- **6.** If you have a licensed version of *Persistence Service*, please see Installing the License File (Section 2.3).
- 7. To verify your installation, enter:

```
> rtipersistenceservice -help
```

You should see a response similar to:

```

-version		Prints the RTI Persistence Service version
-licenseFile	<file></file>	License file. This parameter is optional
-help		Displays this information

2.2 Windows Systems

You do not need administrator privileges to install Persistence Service.

Install *Persistence Service* on top of *Connext*. After installation, the **rtipersistenceservice** application will be located in the **<NDDSHOME>\scripts** directory (the same place where you will find **rtiddsgen**, **rtiddsping**, etc.).

Follow the instructions below. All directory locations in this document are meant as examples only; adjust them to suit your site.

1. Right-click the distribution file and extract the contents in the *same* directory where you installed *Connext*. For instance, if you already have c:\Program Files\RTI\ndds.5.x.y, then extract to c:\Program Files\RTI.

- **2.** Add *Persistence Service*'s **scripts** directory to your **Path** environment variable if it is not already included: **%NDDSHOME%\scripts**. (If you need help with this process, please see the *RTI Core Libraries and Utilities Getting Started Guide.*)
- **3.** If you have a licensed version of *Persistence Service*, please see Installing the License File (Section 2.3).
- **4.** To verify your installation, open a command prompt and enter the following:
 - > c:\Program Files\RTI\ndds.5.x.y\scripts\rtipersistenceservice -help You should see a response similar to what is shown in the Linux section above.

2.3 Installing the License File

If your *Persistence Service* distribution requires a license file, you will receive one in an email from RTI.

If you have Connext Messaging and you want to use RTI Launcher¹ to start Persistence Service:

By default, *RTI Launcher* looks for the license file **rti_license.dat** in the top-level directory where you installed *Connext Messaging*. If you choose to save the license file elsewhere, you can configure *RTI Launcher* to look in a different location by using its Configuration tab.

Otherwise:

Save the license file in any location of your choice. When *Persistence Service* starts, it will look in these locations until it finds a valid license:

- **1.** The file specified with the **-licenseFile** option when you start *Persistence Service* from the command-line.
- 2. The file specified in the environment variable RTI_LICENSE_FILE, which you may set to point to the full path of the license file, including the filename (for example, C:\RTI\my_rti_license.dat).
- 3. The file rti_license.dat in the current working directory.
- **4.** The file **rti_license.dat** in the directory specified by the environment variable NDDSHOME.

If you have any questions about license file installation, please contact **support@rti.com**.

3 Available Documentation

The following documentation is provided with the *Persistence Service* distribution. (The paths show where the files are located after *Persistence Service* has been installed in **<NDDSHOME>**):

Ш	Persistence Service Release Notes
